## CLIM4VITIS ONLINE WORKSHOP

Global Change Impacts on Viticulture: The Long Way from  
Sophisticated Experiments and Modelling to Precision Farming

© PIK 2020 by Thomas Kartschall

### AIM OF THE WORKSHOP

This workshop will focus on climate change impacts on viticulture. The different talks will cover topics from the adaptation to climate change to emerging wine regions and new perspectives in viticulture and winemaking, with a particular emphasis on German wine regions. After each presentation, the audience is invited to participate in a panel discussion on the topics presented.

The workshop will have German-English / English-German simultaneous translation.

**Target audience:** Researchers, viticulturists and stakeholders from the winemaking sector, MSc and PhD students.
