OBJECTIVE

The **Clim4Vitis** project (Climate change impact mitigation for European viticulture: knowledge transfer for an integrated approach) is specifically focused on the topic of **climate change and its potential impacts on European viticulture**, giving particular attention to two main lines of research:

Grapevine modelling

Methods and tools for assessing climate change impacts on European viticulture

EUROPEAN LEVEL IMPACTS

Improved prediction and analysis of climate change impacts on European viticulture

Identification of new opportunities of economic growth and enhanced EU competitiveness

Establishment of working partnerships between academic and business stakeholders

Contribution to the definition of regional climate change adaptation measures for European viticulture

REGIONAL LEVEL IMPACTS

Increased added value of UTAD in improving future sustainability of the Portuguese winemaking sector

Knowledge and technology transfer among Clim4Vitis partners, and between UTAD and national entities

PARTNERSHIP

Clim4Vitis started in September 2018. It involves researchers from 5 institutions:

- Universidade de Trás-os-Montes e Alto Douro – UTAD, Portugal (coordinator institution)
- Potsdam Institute for Climate Impact Research – PIK, Germany
- University Degli Studi di Firenze – UniFi, Italy
- Luxembourg Institute of Science and Technology – LIST, Luxembourg
- Sociedade Portuguesa de Inovação – SPI, Portugal

Clim4Vitis is an EC funded action (H2020-WIDESPREAD-05-2017-Twinning).

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement n° 810176. This document reflects only the author's view and the Commission is not responsible for any use that may be made of the information it contains.
