

CLIM4VITIS CONFERENCE

OPEN DAY

UTAD, Vila Real

An official final conference will be organized to outline some of the most important challenges that the viticulture & winemaking sector is facing, particularly those driven by climate change. World-renowned scientist, European and Portuguese agencies will provide their viewpoints into future funding opportunities to warrant the sustainability of this line of research. This event will be a platform for stakeholders for promoting knowledge transfer and S&T capacity building.

Target audience: Winemaking companies, clusters and associations, viticulture research academia, municipalities, and media groups.

22 November 2021 | 14h30 - 19h00

Aula Magna

14:30 – 15:00	Opening Session
