Climate change impact mitigation
for European viticulture

CLIMATE CHANGE THREATS

SHORT-TERM ADAPTATION STRATEGIES

LONG-TERM ADAPTATION STRATEGIES

SHORT AND LONG-TERM ADAPTATION OUTCOMES

	INCREASED DROUGHT AND HEAT TOLERANCE		INCREASE PLANT RESISTANCE TO PESTS AND DISEASES
	DELAYED PHENOLOGY AND DEVELOPMENT		LOWER RADIATION IN THE CLUSTER ZONE
	REDUCED SUGAR CONTENT		pH ↓ INCREASED ACIDITY
	STABILIZE GRAPE BERRY QUALITY AND TIPICITY
